A Classic Revised

For almost a decade treasure hunters have relied on *Modern Metal Detectors* by Charles Garrett, the Grand Master Hunter of all treasure hunters. From how-to-buy to how-to-use it was recognized as "the complete, authoritative home, classroom and field guidebook" to successful metal detector operation. Fully revised for the 1990s, the Guidebook now contains these additional sections on computerized detectors:

- History and Development
- Detectors and their Features
- Computerized Functions and Controls
- Selecting a Detector and Searchcoils
- Advanced operation and Field Use

This totally new revision will be especially welcomed by countless hobbyists and professional treasure hunters who seek the latest information on using amazing new computerized detectors. This Guidebook on the science and hobby of 21st-century treasure hunting is a *must* for anyone who operates any kind of metal detector.
