

Find Gold

You can find gold with a metal detector. It's easy... when you know how!

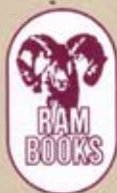

Just follow three simple rules:

1. Look in the right places, areas where gold has been found;
2. Search correctly, using a modern high quality detector;
3. Be patient and persistent.

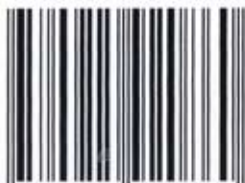

Two veterans of metal detecting and prospecting share their lifetimes of secrets to prove that the right detector can produce more ounces of gold per dollar invested than any other type of equipment.

And, hunting for gold in God's great outdoors can be fun! Learn how to recover nuggets in stream beds, search for veins, seek nuggets in dredge/mine tailings and open up new vistas of excitement and profit.
