October 2014

Garrett Metal Detectors®

Charles Garrett

In our continuing *Searcher Spotlight* features, Garrett editor Steve Moore visits with different treasure hunters. In each short article, we'll tell you what makes our featured finder tick: what they hunt with, where they hunt, and their unique tricks or tips to being successful.

Many young treasure hunters have been inspired to take up metal detecting after watching YouTube videos filmed by one of their peers, 20-year-old Michael Bennett of North Carolina.

Although he will hit the ripe old age of 21 in November, his passion for hunting history is clear to all. The collection of coins and artifacts he has amassed is quite impressive.

He began digging at age 14 after getting excited to metal detect while watching Tom Massie's "Gold Fever" TV show with his grandpa. He borrowed his grandpa's crude detector, went outside and soon dug a piece of a double-barrel shotgun. "I was hooked at that point," he admitted.

Michael got his own *ACE 250* from his parents in November 2008, and has not slowed down since. He used both VLF and pulse detectors over the next few years before he settled into a new favorite, the Garrett *AT Pro*, in 2011. "My other relic machine finally played out," he

SEARCHER SPOTLIGHT

Michael poses with some of his favorite buttons, coins, and relics he has found with his *AT Pro*.

Michael "Nugget Noggin" Bennett

said. "And I was tired of having to wrap it in a plastic bag when it started raining. The *AT Pro* is waterproof, and I found that it could pull good coins and relics

out of trashy iron spots better than my old machine could."

His nickname goes back a number of years and came from his grandfather Jerry.

(Continued on page 4)

Finder: Timothy H., Independence, MO
Using: ACE 250
Find: Brass starburst medal

Finder: Paul W., Bargoed UK
Using: AT Pro
Find: 1566 hammered sixpence from Elizabeth the 1st reign.

Finder: Shane S., Norfolk, NE
Using: ACE 350
Find: 1901 German Zwei Mark

Finder: Terry W., Plymouth, Devon, United Kingdom
Using: AT Pro International
Find: Comrades of Great War badge from World War I

Finder: Allan P., Rock Creek, OH
Using: AT Pro
Find: 1865 U.S. 2-cent coin

Charles Garrett's Code of Detecting Ethics

Charles Garrett has long been an advocate of responsible treasure hunting. He urges all detectorists to leave their hunt areas in better condition than they found it. Here are just a few of his keys to good conduct in the field:

- Never trespass or hunt on private property without permission.
- National and state parks/monuments, etc. are absolutely off-limits.
- Always fill in every hole that you dig.
- Do not leave litter or other discarded junk items lying around.
- Always carry out all rubbish and dug targets with you when you leave a search area.
- Use reasonable caution in digging toward any target, particularly in areas where you are uncertain of the ground conditions.
- Keep informed on and obey all local and national legislation relating to the discovery and reporting of found treasures.

Good luck and
happy hunting!

Charles Garrett

Garrett Finds From the Field

Finder: Chris D., Olin, IA
Using: *AT Pro*
Find: .36 Remington "tear drop" pistol bullets

Finder: Samuel C., Spring Hill, TN
Using: *ACE 250*
Find: Irish Brigade pin

Finder: Arland B., Rapid City, SD
Using: *ACE 250*
Find: Wheat pennies, rings, a 1914 "Joseph Bingham" trader coin, a bullet, an Indian Head nickel, and a chunk of pyrite.

Finder: Mark L., Chilliwack, British Columbia, Canada
Using: *AT Pro*
Find: \$10,000 lost ring reunited with its owner after two years of being lost.

Finder: Bobbie C., Georgia
Using: *AT Pro*
Find: Cap gun

Finder: Bob H., Peterborough, Ontario, Canada
Using: *ACE 250*
Find: Bob put his *ACE 250* to the test when asked to help find his brother's lost wedding ring. The ring was returned to his brother's finger about ten minutes after his hunt started, thanks to his *ACE 250* and *ProPointer*.

Finder: Rob J., Derbyshire, UK
Using: *AT Pro International*
Find: 1500s pilgrim badge (above) and 1800s silver thimble (right)

Searcher Spotlight

(Above) These are some of Michael's favorite water finds from the past year, all made with his Garrett *AT Pro*. The case at top includes a minie ball shaped into a fishing sinker, along with a U.S. box plate and U.S. belt plate. The hatchet heads were used for chopping shingles in the 1800s. Note the blunt end for hammering nails and the nail pry notches. The case also includes two 12-lb. Revolutionary War cannon balls, a 6-lb. solid shot ball from the Civil War, and a 12-lb. Borman fused artillery shell. The gun in the case is a 1914 German Mauser pocket pistol.

(Above) Michael dug this cameo ring on an old house site built in the 1880s. Cameo is a method of carving an art piece whose image contrasts its background color.

(Below) One of Michael's display shelves, featuring early bottles, Civil War-era stirrups, and a broken cannon ball half.

Above: a War of 1812-era artillery button, and a South Carolina state seal button from Civil War era. Right: A First Regiment War of 1812-era artillery button.

(Below) A Confederate belt buckle tongue.

(Continued from page 1)

Michael was always eager to go in search of gold, whether it was sluicing or panning. His eagerness one afternoon finally made his grandpa snap, "All right, Nugget Noggin'! You've got gold on your brain."

The nickname stuck and Michael decided to use it when it came time to pick a handle in 2008 for his YouTube account. Now, more people know him as Nugget Noggin' or just "Nugget." His channel now has more than 40,000 subscribers and his videos more than eight million views.

One of Michael's first *AT Pro* finds came at an old home site he hunted with his friend

Curt Hollifield. Right off the front steps of the house, he dug an 1830 large cent. He moved close to an old well near the house and then began digging a string of great finds: an 1894 Barber quarter, two War of 1812 officers' buttons, a Confederate "Block I" infantry button, a Buffalo nickel, and a Mercury dime.

Michael is always happy to pull items from a "pounded out" site. One of his all-time favorite finds, in fact, was a Confederate "Script I" infantry button that he dug on his birthday. He was using the *AT Pro* with the small 5"x8" DD coil on a heavily-hunted house site littered with shotgun shells.

Nugget Noggin' is quick to offer advice to new detectorists who often contact him. For

Searcher Spotlight

(Above) Confederate "Script I" infantry button found by Michael near an old log cabin in the forest. At the same site, he dug this 1853 silver half dime (upper right).

basics, he advises to keep your searchcoil low to the ground and always recheck your dig holes for multiple targets. "Some ideal places to search with your detector are around big trees, along sidewalks, and driveways. I have dug many silver coins along driveways. People get out of their car and when they pull keys out of their pocket sometimes coins fall out on the ground," he offered.

"Do your research," he says. "If you don't have a good hunting spot, you don't have good chances. But even with a good spot, you really must know how to use your machine. I always tell beginners to dig everything. Put it in All Metal Mode or Zero discrimination and dig all the targets. That way, you'll get used to how nails sound and how different kinds of iron read."

He personally chooses to use just a little bit of discrimination to get rid of tiny iron. "I basically dig everything from large iron all the way up. There are some great iron relics, so you can't skip big iron signals," he says. "I never discriminate out pull tabs or anything like that. I just dig all the signals because some of those in the pull tab range

will be gold rings.

"One time, I had a signal that was 'iffy' and I passed it up. Then one of my buddies came along and dug up something good. After that, if I passed up a signal that didn't sound great, it would start to bother me. I'd turn around and go back and dig it to see what it was. Now, I don't skip anything above tiny iron. I just dig it all so I don't pass up something good."

Michael's advice for others who are new to metal detecting is to simply go slow. "Don't be in such a hurry to race to the next best place. If you find something really good, then keep searching that area.

Normally, where I find one good thing, I'll find something else good there."

Finally, he advises new diggers to not get discouraged. "I have had plenty of hunts where I didn't find silver or gold or even a great relic," he said. "If you watch some of my videos, sometimes I might just find a horseshoe or some trash items. But I show it anyway on the video."

This 2-cent piece from 1864 is one of Michael's favorite coin finds.

(Left) Coins and button dug by Michael with his AT Pro at one old home site. Clockwise from upper left are: an 1830 large cent, a Mercury dime, a Buffalo nickel, an 1894 Barber quarter, a War of 1812 officer's button, a Confederate Block I infantry button, and in the center is another War of 1812 button.

(Below) Michael is on the hunt for more water relics with his frequent detecting companion Abby in summer 2014.

Michael found this silver World War II paratrooper's pin behind an old school. This photo also shows his preferred AT Pro settings: Pro Zero Mode, iron disc at 22, and Iron Audio off until he needs to check a choppy signal.

International Discoveries

Finder: Grega J., Blanca, Slovenia
Using: ACE 250
Find: An avid history-lover, Grega went searching for relics from WWII, specifically a resistance movement in Slovenia. During his hunt, he unearthed a cap badge from the very resistance fighters he was searching for.

Finder: Jonathan M., Newquay, Cornwall, UK
Using: EuroACE
Find: Medieval book clasp

Finder: Jauca F., Bistrita, Romania
Using: ACE 250
Find: Saxon ornament

Finder: David L., Meath, Ireland
Using: EuroACE and AT Pro
Find: David L. was searching his father's back garden with his daughter Bonnie when they got a nice hit and found this rare Ireland bronze cap badge from 1913 with "Oglaig na h-Eireann," meaning Irish Volunteers.

Finder: Paul F., Hereford, England
Using: EuroACE
Find: After receiving permission to hunt on a large farm, Paul found many items such as buckles, horseshoes, buttons, but his favorite find has to be a medieval brooch, dated 1200-1500.

Finder: Csaba N., Guessing, Austria
Using: EuroACE
Find: Csaba and his girlfriend found this 2.1 gram gold nugget while prospecting in Australia.

Finder: Craig N., Brisbane, Australia
Using: AT Pro
Find: While hunting an American military camp outside of Brisbane, Craig came across this officer's eagle hat badge and trench art, made by American servicemen during the war in 1942.

Finder: Simon C., Hong Kong
Using: AT Pro
Find: 999.9 pure gold snake ring found on Golden Beach, Hong Kong. It must have been destiny for Simon to find such a "golden" treasure!

Finder: Dori H., Spruce Grove, Alberta, Canada
Using: AT Gold
Find: During a metal detecting vacation in Colchester, England, Dori found this beautiful 1733 gold guinea love token.

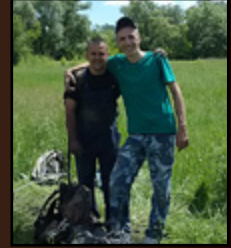

Russian 100-Kilogram Coin Cache

Finder: Dmitry, Moscow, Russia

Using: *GTI 2500*

Find: Dmitry was happy to head to the detecting fields with his detecting buddy. They had heard that someone had found a significant treasure in the area they planned to hunt. "When we came to the country where people had found the coins, we saw a lot of holes," Dmitry said. He and his companion began searching in the field, hoping those

who had been there before had missed some treasure. For 40 minutes, Dmitry's *GTI 2500* was silent, but then he began finding big copper coins. During the next four and a half hours, they dug 100 kilograms worth of 18th century 5-kopek coins. Dmitry said that on this day, he truly understood the meaning of the phrase "to rake in the dough"!

(above) Dmitry and his detecting buddy after the find.

Dmitry and his friend had to struggle to carry all of the coins from the field.

Above: View of the 5-kopek coins in the dirt and (right) after cleaning.

The dates ranged from the late 1700s to just after the turn of the century.

Finder: Robert C., Elkmont, AL

Using: *AT Pro*

Find: While detecting in a cave system, Robert found a lead fishing weight with his *AT Pro*. After rechecking the hole, he discovered six arrowheads.

Finder: Roger K., Detroit Lakes, MN

Using: *ACE 250*

Find: 1897 and 1903 Barber quarters, 1904 Barber dime, and a 1915 Buffalo nickel

Finder: Keith M., Moreno Valley, CA

Using: *ACE 250*

Find: While hunting in the hills by an old house foundation, Keith found this 147 wheat cents cache in a Lucky Strike tobacco tin.

ATX™ Deepseeker® Package

Find deeply buried objects, large gold, caches, relics and more with the oversized ATX Deepseeker searchcoil. Buy the package and save money—plus get a free hard case!

Finder: Craig A., Winona, TX

Using: *AT Pro*

Find: 1811 Mexican coin featuring King Ferdinand VII of Spain.

Relics, Rarities and All Kinds of Finds

Finder: Tim K., Summerfield, NC
Using: ACE 350
Find: WWII Navy dog tag returned to the daughter of this veteran.

Finder: Mark A., Onoway, Alberta, Canada
Using: AT Pro
Find: Helmet nose guard, estimated to be 200 years old.

Finder: Shanae S., Linton, IN
Using: AT Pro
Find: Shanae was searching her father's childhood home when she came across a pocket watch lighter. This lighter was used by her grandfather every day until it was lost.

Finder: Brian O., Stockton, NJ
Using: ACE 350
Find: Little Orphan Annie decoder ring

Finder: Morgan R., Crandall, GA
Using: AT Gold
Find: 3-ringens and Confederate Infield bullets found in areas that have been hunted before.

Finder: Larry B., East Selkirk, Manitoba, Canada
Using: AT Pro
Find: Toy horse found on a farm site where Larry's father was born.

Finder: J.D. H., Webb City, MO
Using: ACE 250
Find: J.D. recently purchased an ACE 250 and has found many unique items in his own back yard, including an 1892 Dog license, an 1899 Indian Head penny, a 1900 V nickel, and a few Missouri sales tax tokens.

Finder: Vincent S., Millville, NJ
Using: ACE 250
Find: Cannon shot from the Revolutionary War

Coin Finds

Finder: Joshua T., Greenwell Springs, LA
Using: *AT Gold*
Find: 1881 British cent, 1850s American large cent, and a 1782-1820 Shan-Lung dynasty Chinese coin.

Finder: James B., Sidman, PA
Using: *ACE 350*
Find: James found a beautiful 1804 keydate large cent with his *ACE 350*. This coin was verified and submitted to PCGS at the 2013 Florida United Numismatics Show in Orlando.

Finder: Chris H., Ludlow, KY
Using: *AT Pro*
Find: 1898 Barber dime, a 1940 Mercury dime, and a 1899-S Barber half dime

Finder: Joe M., Bethlehem, PA
Using: *AT Pro*
Find: 1835 half cent

Finder: Ryan L., Syracuse, UT
Using: *AT Gold*
Find: 1926-S Mercury dime

Finder: Tentis M., Varnamtown, NC
Using: *AT Pro*
Find: 1851 silver 3-cent piece

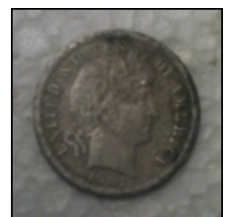

Finder: Peeters T., Rijkevorsel, Antwerpen, Belgium
Using: *AT Pro International*
Find: Bronze coin, a silver coin and a bronze ring, from the period of Napoleon III, dated around 1862.

Finder: Chris A., Green Lane, PA
Using: *ACE 150*
Find: George Washington button, 1757 King George the 2nd button, 1650 French Liard coin, and two large pennies from the 1880s.

Finder: Don C., Plainfield, IL
Using: *AT Pro*
Find: 1907-O Barber dime

Find: Silver token

Finder: Matthew M., Cassadega, NY
Using: ACE 250
Find: Matthew was searching an old family farm when he found the bottom half of a Third U.S. Artillery metal. The metal reads "Grand Army of the Republic 1861 - Veteran - 1866".

Finder: Simion M., Saint David, AZ
Using: Treasure ACE 100
Find: Gold dog charm

Finder: Samuel D., Ohiopyle, PA
Using: AT Pro
Find: Aluminum coupon for ivory soap and a silver 3-cent piece (1851-1873).

Finder: Nick L., Lockport, IL
Using: ACE 250
Find: WWII Good Conduct medal

Relic Roundup

Finder: Robert D., Calhoun, GA
Using: *AT Pro*
Find: Robert and his father (*above*) first metal detected together more than 31 years ago. In recent years, Robert found himself busy with work and children. In 2013, he decided to upgrade his old detector by purchasing an *AT Pro* so that he and his father could enjoy relic hunting again more often. These minié balls and eagle breastplate were found in an area near Resaca, Georgia that they have hunted “many, many times with several different detectors over the years,” according to Robert.
 “We thought we had found most everything, but the *AT Pro* said otherwise!”

Finder: Randy D., Imperial, MO
Using: *AT Pro*
Find: Randy hunted out 35 fired rounds from a Civil War spot in St. Louis using a Garrett *AT Pro*.

Finder: Daniele S., Toscana, Italy
Using: *ATX*
Find: Daniele sent this photo of relics found with the Garrett *ATX* on a World War II site where the Battle of Belvedere Suvereto took place in 1944. Most of these relics are from the U.S. Army’s 442nd Regimental combat team, an infantry regiment comprised almost entirely of Americans of Japanese ancestry. The 442nd was involved with driving back German forces.
 Many of the relics recovered by Daniele were ammunition, but there were also many personal items used by the soldiers of the 442nd Regiment: the remains of web equipment, razors, shaving cream containers, coins, and beer bottles.

Finder: Jonathan B., Hatfield, PA
Using: *AT Pro*
Find: City of Philadelphia Fire Department button

Finder: Darren E., Johannesburg, South Africa
Using: *ACE 250*
Find: After the meticulous research, Darren set out to uncover relics on the site of an Anglo Boer War concentration camp. He found these toy soldiers that belonged to the children in this camp.

Sand, Surf and Swimmin' Holes

Greek Coin on a Russian Beach?

Finder: Alexey, Russia

Using: *AT Pro*

Find: Alexey's favorite place to treasure hunt is Archangelsk central town beach, opposite from the beer factory. "I always find interesting coins in good condition," says Alexey. "As a rule, I always search during low tide. On Wednesday, June 11, I went to the same place on the beach and started to search thoroughly. Usually, I divide the area into squares. It is strange: the finds never end. The water periodically brings fresh ones.

"The first hour of my search gave a few Soviet coins, a gold pendant, and an aluminum bottle cap. It was about 9:00 p.m. when I decided to return home, but I usually do not turn off the detector until I've left the beach. Halfway back, I heard a clear signal. I just pushed the sand and noticed that something flashed. I found a strange silver coin. Of course, the beach sometimes surprised me but this kind of coin I saw for the first time. I rushed home.

"There, I cleaned the coin, made a picture and uploaded it to the hunters' forum. My find was a Roman denarius of Tully (120 BC). I was tremendously surprised, and this is why: Archangelsk was founded in the 16th Century AD, and the oldest settlement was dated the 12th Century. How can this coin have been there? But the mystery is pleasant and unexpected."

Above: This silver Roman denarius coin, ca. 120 BC, was found by Alexey with an *AT Pro*.

Finder: Bob F., Colleyville, TX

Using: *AT Pro*

Find: Texas drought and lower lake levels made for productive hunting for Bob this spring. In one weekend on Lake Granbury (*lower photo*), he recovered fifteen wheat pennies, two Indian head pennies, and seven silver coins (*middle image*). Among other finds were a railway badge and a BPOE Hillsboro, Texas Elks Lodge pin from the early 1900s (*see above*).

Finder: Krystyna Z., Bialystok, Poland

Using: *AT Pro*

Find: Krystyna lost her confirmation ring the day she got it in 1951. After years of thinking that metal detecting was dangerous and only reserved for the military, Krystyna picked up an *AT Pro* to search the area that she lost her ring. After scouring the beach, she decided to search the shallow water and she came up with her own long-lost ring.

Finder: Alan K., Honolulu, Hawaii

Using: *Sea Hunter Mark II*

Find: Rings found in the water off Waikiki.

Finder: Thomas R., Palmyra, VA

Using: *Sea Hunter* and *ATX*

Find: His most memorable finds include gold and silver rings, coins and a 18.5 gram platinum ring.

Finder: James W., Central Point, OR
Using: ACE 350

Find: James shared this story of finding his own ring, lost in a tragic accident decades before. "When I was 20 years old, I fell on a chainsaw when cutting fire wood in the mountains with my father," he wrote. "Trying to catch myself with my left hand, you can only imagine what happened. I lost my pinky and ring finger, and a few days later my hand from severe damage.

"Twenty-eight years later I got my first metal detector, an ACE 350. I had a ring on my left finger when I had the accident, and thought many times of going to the mountain to try to find it thinking maybe it could help me feel better about what happened. I spent several hours up there looking for my ring with my ACE 350, but could not find it. It was getting dark, so I headed for my van when I heard a faint *ding-ding!* This could not be it; I was about 20 or 30 feet from where my accident happened.

"I dug down about ten inches only to find a nest with small sticks, grass and bones! It looked like human bones, then moving things around with my finger, *there was my ring to my surprise.* I don't know what kind of nest it was, and it looked old, but I was excited to be reunited with my little ring after such a long time. This experience gave me a new excitement for metal detecting, and I was now an official treasure hunter."

Thanks for sharing your story, James. We wish you great success in the field!

Finder: Dave G., Plain City, OH
Using: ACE 350
Find: Dave and his son found and returned this Gerber knife to a Boy Scouts leader who lost it in their camp.

Finder: Scott D., Plattsburgh, NY
Using: AT Pro
Find: Rifleman's buttons from the War of 1812

Handing Back History

AT Pro user Ed D. of Flower Mound, Texas shared this story of his recovery and donation of a rare silver ring.

"I am involved in a lot of networking events and recently made a connection who invited me to hunt around a historic building. After a few hunts I found a small silver item that at first I thought was a crushed class ring. But, after cleaning off the dirt that encased it, I saw that while it was related to a college, it was not a ring. The item said 'Decatur Baptist College 1934' and was [what I assume to be] a small jewelry item or uniform decoration.

"Research showed that Decatur Baptist College was America's first two year college in America and in the mid 1960s became Dallas Baptist University. After numerous

Ed turned his rare ring find over to officials with Dallas Baptist University's archives.

calls and emails, I came in contact with someone at Dallas Baptist University who is an expert on the Decatur college and who oversees the archives from the old college. He stated that he had never seen any item like this, saying the original college was very poor and had no class rings or any items like that. They did have uniforms, but the uniforms did not include any such decorations, especially any made of sterling silver.

The item did have some initials on the back side and through school records we were able to identify the original owner. Unfortunately we have not been able to locate her. We think the item was part of a bracelet that the original owner, or owner's family, had made especially for them.

"I decided to donate the item to the Dallas Baptist University's archive of memorabilia from the original Decatur Baptist College. I have also been invited by the university to attend the next reunion of the original college next spring.

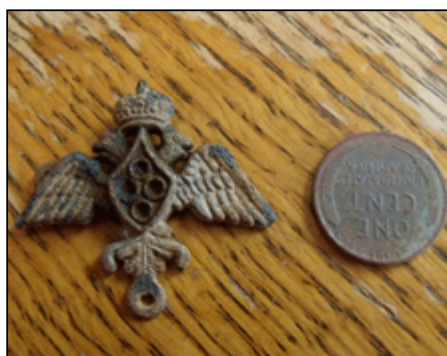

"This hobby has been such a great way to give back!"

Relics, Rarities and All Kinds of Finds

Finder: Glyn T., Mid Glamoran, South Wales, UK
Using: ACE 250
Find: 17th century trade token

Finder: Wayne K., Womelsdorf, PA
Using: ACE 250
Find: Russian Air Force relic

Finder: Tim K., Summerfield, NC
Using: ACE 350
Find: This WWI US Army Medical Corps Veterinarian collar device was found in a field in Dinwiddie County, Virginia.

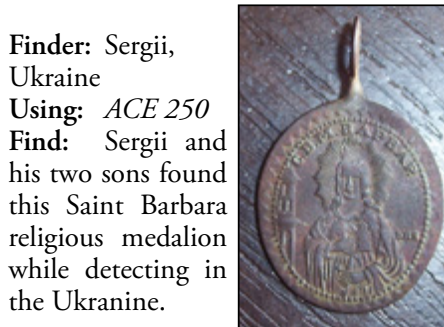

Finder: Shannon C., Spring Hill, TN
Using: ACE 250
Find: Civil War bullets

Finder: Shane C., Franklin, TN
Using: AT Pro
Find: Two buttons

Finder: Everett T., Sycamore, OH
Using: AT Pro
Find: Relics found on old home site.

Finder: Sergii, Ukraine
Using: ACE 250
Find: Sergii and his two sons found this Saint Barbara religious medallion while detecting in the Ukraine.

Finder: Gerd M., Bavaria, Germany
Using: ACE 250
Find: Gerd found two silver Kreuzer coins and other finds from a great day of metal detecting in Bavaria.

Finder: Brian W., Spartanburg, SC
Using: AT Pro
Find: Dog tag found on part of an old WWI camp.

Finder: Jim B., Riegelsville, PA
Using: AT Gold
Find: While hunting on property built in the 1700s, Jim found this U.S. breast plate.

Relics, Rarities and All Kinds of Finds

Finder: Adam D., Brookline, NH
Using: *AT Pro*
Find: Federal officer staff button

Finder: Thomas W., Kimberly, WI
Using: *ACE 350*
Find: Wisconsin and Northern Railroad switch key (pre-1920s)

Finder: Bruce M., Great Falls, MT
Using: *ACE 250*
Find: Relics recovered from outside an old fort site.

Finder: Ashley M., Brookline, NH
Using: *ACE 250*
Find: Civil War bullet mold

Finder: Michael B., Palmer, TX

Using: *AT Gold*

Find: Michael and a friend were out in March, searching a house that was being torn down in East Dallas. "I am walking along and get this hit on my *AT Gold*, bouncing from 72 - 78, and giving me a mid and then high tone," he said. "So I dig a plug and out comes a 1968 Woodrow Wilson High School ring. It still looked almost new with no shank wear at all."

After getting home and cleaning it up, Michael saw that it was a Balfour 10k with the owner's initials inside it. With help from a forum friend, he was able to track down the owner and schedule a time to meet him for the return. The

man (seen standing beside Michael) had lost his ring playing football with his friends in 1968.

"To see the smile on his face after having his ring returned to him after so

many years was worth triple the value of the gold in the ring!" Michael said. "Money is not everything in life and doing the right thing promotes our sport of metal detecting in a good way. We talked for a while over lunch, which he so graciously bought for me and my friend."

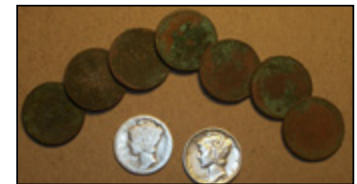

Finder: Tony F., Bullard, TX

Using: *ACE 250*

Find: Tony used his *ACE 250* to help out a young girl in need. She had lost her 14k gold ring with an emerald stone that her father had given her for Christmas. Tony was able to find the ring after searching for only 20 minutes. "I called her mom and told her that I had found it and would bring it to her right away," he wrote. "I asked her not to tell her daughter, but to let me surprise her. The look on that little girl's face was priceless. This for me is and will always be my 'find of a lifetime.'"

Good job, Tony!

Finder: Cyrus K., Glennie, MI

Using: *AT Pro*

Find: Two silver Mercury dimes (1917 and 1943) and 7 wheat pennies.

Finder: Rudy B., Modesto, CA

Using: *AT Pro*

Find: While hunting on an old hotel site in the Sierra Nevada mountains, Rudy started getting signals from a rotting stump. These signals then led him to an Indian spear point and then to a .41 caliber pistol bullet.

Finder: Jeff W., Archbold, OH

Using: *AT Pro*

Find: 1946 Walking Liberty silver half dollar and a 1943 war nickel.

Young Guns

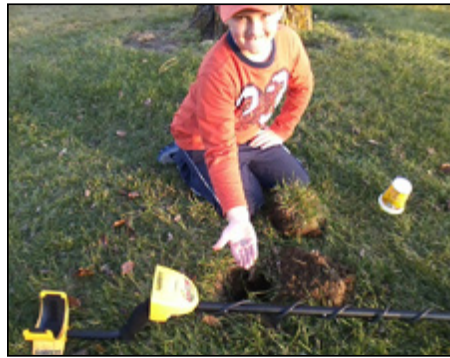

Finder: Mark R., Carmel Valley, CA
Using: Ace 250

Mark wrote to Vaughan Garrett to share the appreciation for detecting his family had discovered. "My wife Jennifer and I have two boys on the Autism spectrum. Our youngest is Jesse and his older brother is Mike. The first picture (*above*) shows what they are usually up to: computer and Gameboys. We live in a rural town, right on the main street so going outside and playing can be quite challenging. We decided to take up two new activities that would take us outside doing something else—geocaching and metal detecting. We did a lot of research and decided on the *ACE 250*. We spend most of the time down on the beach but last weekend decided to visit our local park. We found some pull tabs and some clad along with some old copper pennies. For us, it's not always about the find but more about the enjoyment and fulfillment that WE ALL get from getting outdoors and 'finding that treasure'. It brings a smile to their faces."

The Garrett Searcher

Finder: Corey L.
Using: ACE 350
Find: This happy boy shows off the 1937 Mercury dime he has just found with his father.

Finder: Christian M., Loveland, OH
Using: ACE 250
Find: 12-year-old Christian unearthed a WWII Army officers eagle hat pin.

Finder: Randy C., Rowlett, TX
Using: ACE 250
Find: Hunting at a local park, Randy and his daughter Madison found her first coin—a 1968 dime.

Finder: Mike F., Hagerstown, MD
Using: AT Pro
Find: Mike brought his daughter out to hunt his brother's house with his *AT Pro*. She found and dug a Hubley Trooper cap gun, made in the 1950s.

Using: *AT Pro*
Find: Military First Class Army hat badge

Alaskan Visit Proves Golden

Buddies Dave F. from Kirkland, Washington, and Jeff S. made a week-long prospecting trip to Nome, Alaska during the summer. Jeff, owner of Treasuredude Detectors in Seattle, hunted with his *AT Gold* while Dave tested out his new *ATX*. They hunted on a claim owned by Alaska Gold and Resort.

They worked an area on top of a hill where the ground had already been dug out by other prospectors in the past. Jeff dug seven pieces of gold (most containing quartz within the nuggets) totaling 1.13 ounces, the largest piece being a third ounce piece. Using the 8.5 x 11" DD coil on his *AT Gold*, Jeff dug one of his larger nuggets about 18" deep.

Dave was very pleased with his own efforts, as he netted 2.73 ounces of gold in eleven pieces with his *ATX*. "Last year with another brand detector I found one nugget but this year with the *ATX*, I found 16 in the same area!" he said. His finds ranged from tiny nuggets only two inches deep to 3/4 ounce nuggets at 14-inches depths. Dave added, "I also found a Silver 1902 Barber dime and a 1905 Indian Head penny at about six inches, so the *ATX* make a fine gold and coin machine! I can hardly wait to go back next summer and tear it up again."

Using his *AT Gold*, Jeff found seven pieces of gold that weigh in for a total 1.13 ounces.

Jeff and Dave (right) are all grins with some of the larger gold pieces they found displayed on the bills of their caps.

ATX Finds From the Field

Finder: Dan F., Williamsburg, VA

Using: ATX

Find: Dan submitted these photos in the spring of various Civil War bullets, iron artifacts, early coins, and colonial relics that he had found with his ATX so far in 2014.

Finder: Joseph D., Long Beach, CA

Using: ATX

Find: 1945 two and a half Mexican peso gold coin

Finder: Wayne W., Morenci, AZ

Using: ATX

Find: A co-worker of Wayne's was attending a family gathering at a local river, when her granddaughter lost a 24k gold bracelet in the river. They looked for several hours, but came up with nothing. The co-worker asked Wayne if his metal detector would work underwater and if he could help them find it. A few days later he brought his detector to

the spot in the river where they had lost the bracelet. After twenty minutes of searching with his ATX, he was able to recover the bracelet for his co-worker.

Alaskan Visit Proves Golden
Continued from pg. 26

Dave found 16 pieces of gold with his ATX.

The smallest pieces are shown in close-up on top of this dime.

“Garrett Lads” of England find a Viking Hoard

Finder: Justin B. and Daniel B.

Using: *AT Pro* and *EuroACE*

Find: After reading their story in the UK's *The Searcher* magazine, Vaughan decided to award the so-called “Garrett Lads” with a Favorite Find of the Month.

They had discovered the hiding place of almost 1kg of Viking silver. The hoard is made up of solid silver ingots and pieces of bracelets, some of which have been identified as possible Russian silver dated approximately 900AD. Daniel found the first ingot with his *EuroACE*. It measured over two inches in length and weighed 51g. Justin, searching with his *AT Pro* while inspecting Daniel's find about a foot away, picked up a good signal at around 6–8 inches. Justin was hunting in Pro Mode with zero discrimination.

Justin uncovered the soil to discover a silver ingot that measured almost four inches in length and one inch wide. Its weight was a staggering 128g. This single ingot is one of the largest to be found in the UK. Altogether, Justin and

Daniel uncovered 19 pieces of silver with a weight of almost 1kg, indicative of somebody of significant wealth and importance. The ingots had been buried together in a shallow hole with an aim to be recovered but for some reason the owner failed to return for them.

The find is now in the hands of their FLO (Finds Liaison Officer) who has started the identification and treasure trove process. Hopefully, this is just the beginning of the Viking finds for the “Garrett lads.” Congratulations.

Finder: Tre U.,
Wendell, OH
Using: *ACE 350*
Find: 1897
Barber dime

Finder: John G., Wichita, KS

Using: *AT Pro*

Find: Grandmaster symbol for the Knights of Pythias order (1874).

Finder: Chad A., Williamsport, MD

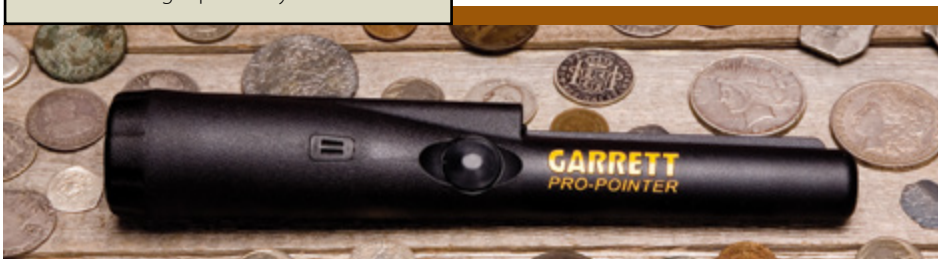

Using: *ACE 250*

Find: While hunting some property on the border of Pennsylvania and Maryland, Chad and his wife came across this antique Westinghouse 10-watt tipped light bulb, circa 1912. It's amazing that it did not break after 100 years!

Jewelry and Ring Finds

Historic find in Denmark

Finder: Dennis M., Denmark

Using: *AT Gold*

Find: Dennis made this remarkable find while detecting in May off an island in southern Denmark. The location was the surroundings of an old castle that had been torn down in 1677.

Dennis relates, "After a couple of hours of not finding much, I had a 50 target ID on my *AT Gold*. I remember thinking it was probably another button, and as it was only two inches deep, I didn't expect much. I dug it and did not believe what I was seeing...a HUGE gold ring with a lot of stones! I picked it up and was aware that this wasn't a modern ring...it looked renaissance! We called the local museum and they arrived shortly after.

"The museum took the ring to a jewelry shop who clarified that it was all diamonds and that the ring

weighs 7.3 grams. So it is very likely (because of its extravagance) that this is a gift from one of Denmark's most famous kings, Christian the 4th, to his second wife Kirsten Munk. Find of a lifetime!"

This royal ring became a big news story in Denmark. Congratulations on an impressive and historic find!

Finder: Nicholas P., Berthoud, CO

Using: *ACE 250*

Find: Gold wedding ring returned to the owner after being lost for 36 years.

Finder: Jonathan G., Cramerton, NC

Using: *ACE 150*

Find: After moving into his great-grandparents' old home, Jonathan began detecting, in search of buried jars of old coins. He found no chaces, but on his last swing of the day, he got a good signal, which turned out to be his great-grandmother's wedding ring.
