Field testing the **NEW**

AT MAX™

The new wireless *AT Max* is already a big hit with the field testers who have had the chance to search with it in Europe, Australia, and North America.

Garrett has also taken field input to heart, making minor upgrades to the *AT Max*—including the addition of volume control built into the machine. During a recent multi-day outing with the Hoover Boys (Kurt, Brad, Bob, Bill, and Leo) and Relic Recoverist (Jocelyn Elizabeth) in Pennsylvania and Maryland, the group managed to score silver coins, colonial coppers, rings, and relics.

These and other first-time users of the unit report greater detection depth

and an appreciation of a fully wireless unit, which ships with MS-3 Z-Lynk Wireless Headphones included. George "KG" Wyant was impressed that the *AT Max* was sensitive enough to help him pluck out a handful of tiny silver

(Above) Jocelyn Elizabeth with a 1937 Walking Liberty half dollar she dug while testing the *AT Max* in May.

(Below) These tiny silver "Ivan the Terrible" coins from the 1500s were dug by "King George" Wyant in Russia.

Russian Medieval-period coins that are known as "fish scales" during his recent participation in a Russian rally.

In addition to being hot on coins and relics, the *AT Max* has also been tested in the gold fields of Alaska, Idaho, and Australia. Michael Bennett (aka "Nugget Noggin" on YouTube), took a test unit to Nome, Alaska, and scored on a nice size gold nugget (see photo on page 3).

First timer scores BIG!

Finder: Harrison C., Keene, NH

Using: *AT Pro*

Find: After borrowing his father's *AT Pro* for his first time detecting, Harrison made some great discoveries—a President McKinley Cracker Jack token (circa 1930s), an 1890s King George the III token of esteem, 1855 and 1846 Braided Hair large cents, a Coronet large cent, and a beautiful Connecticut state seal Civil War button (circa 1850s to 1865).

"My father was so happy for me that he gave me his *AT Pro*, and he went out and bought himself a brand new *AT Pro*. He told me, 'It's on, Son!' Big thanks to my father and to Garrett detectors for a new, exciting hobby!"

Young Guns - Kids That Love to Detect!

Finder: Daughter of Steve J., Wakefield, West Yorkshire, United Kingdom

Using: *ACE 150*

Find: Steve's youngest daughter, 13, is excited to show off her first ring find at the beach, made in 2016.

Finder: Son of Kevin M., Alberta, Canada

Using: *AT Gold*

Find: Kevin and his 7-year-old son share their finds made while searching with their *AT Gold*.

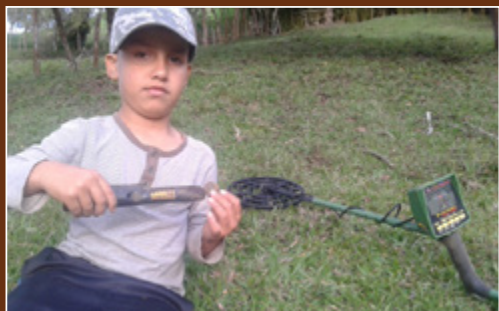

Finder: Ellie, daughter of Robert P., Fircrest, WA

Using: *ACE 400*

Twelve-year-old Ellie, diagnosed with autism at age four, discovered a 1976 Lincoln penny while searching for the first time with her *ACE 400*.

Robert shared, "I put the penny in Ellie's hand and she exclaimed 'Treasure!' We were stunned. Ellie just wanted to continue. Over the next couple hours, we found a grand total of 76 cents, but for Ellie's mother and I, that penny will forever be priceless."

Finder: Bleiber M., Antioquia, Columbia
Using: *GTI 2500*
Find: Detecting with his dad, Bleiber's son discovered a square nail and a coin from the old village of Santa Fe De Antioquia.

Garrett's Code of Detecting Ethics

Charles Garrett always urged his fellow searchers to conduct themselves as responsible treasure hunters and to leave their hunt areas in better condition than they found them. Here are just a few of his keys to good conduct in the field:

- Never trespass or hunt on private property without permission.
- National and state parks/monuments, etc. are absolutely off-limits.
- Always fill in every hole that you dig.
- Do not leave litter or other discarded junk items lying around.
- Always carry out all rubbish and dug targets with you when you leave a search area.
- Use reasonable caution in digging toward any target, particularly in areas where you are uncertain of the ground conditions.
- Keep informed on and obey all local and national legislation relating to the discovery and reporting of found treasures.

Using: *Sea Hunter Mark II*

After four years and countless hours underwater, John feels that he is still building his reputation as a "professional recovery diver." He credits much of his success to his tireless tool, the Garrett *Sea Hunter Mark II*.

He regularly dives rivers and lakes around central Texas, and truly enjoys returning lost items to people. As of 2017, he has found 213 rings, plus many watches, phones, and various antiquities. He also goes out of his way to try and return items of value that he finds in the water, such as wallets, driver's licenses, class rings, and cell phones that are still functioning. "It doesn't come easy," John said, "but there are few things that I enjoy better."

Hunter, and a pile of the rings and other jewelry he has recovered.

(Center, left) A gold and diamond bracelet find.
 (Far right, center) John recovered this Cartier watch for a lady who lost it in 30 feet of water.

Find: Jan II Kazimierz Waza shillings, circa 1760-1766

Finder: Steve B., Georgetown, Ontario, Canada

Using: *AT Pro International*

Find: Steve made the most of his chance to hunt an old 1800s property, obtaining permission from a foreman of a developer working on the land. From a depth of 15 inches, he dug this 14k gold pocket watch chain and fob. It contained a green jade stone with a Victorian lady's image on one side and a black opal stone on the other. Steve's research on the maker's marks show it to be from a craftsman who designed it in the 1824-1899 time frame.

Finder: Brian G., Copperas Cove, TX

Using: *AT Gold, AT Pro*

Find: These are the results of Brian's best detecting day ever, one that made "the hair on my neck stand on end." In addition to two buffalo nickels, five Wheaties, four Mercury dimes, a 1942 Walking Liberty half dollar, a 1971 Kennedy half, an Andrew Jackson dollar coin, and other finds, Brian dug this 1882 Indian Princess gold dollar coin.

"You never know what is going to come out of the ground!" he said. "I decided that I would buy a good quality gold chain and had a jeweler put it on the chain."
